

# 「brackets」

Settle into the comfortable seating for relaxed conversations and connection. The ambience different from daily workspaces or formal meeting rooms naturally shifts your mindset into the thinking mode.

# FEATURES

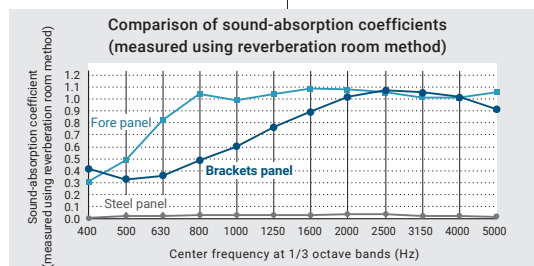

## Sofa and table module system that defines a space simply by its placement

You can combine the sofa modules with tables to form a variety of workspaces, from a meeting space to a space for focused work. The sofa modules all have the same height for maximum operational efficiency.

The corner units form a 90-degree linear corner on the outside and a rounded corner on the inside, achieving both aesthetic appeal and comfort.

### Sound-absorbing cubicle panel

The panel has an acoustic urethane core as used in motor vehicles. At ambient noise levels of 500–1,000 Hz (background noise from people talking and other noise sources), this material achieved a noise reduction effect of 0.33–0.60, significantly better than that of steel panels.

•These are the results of a characterization test conducted on each individual panels.  
•The test results are not guarantees of actual sound-absorption performance.  
•The test was performed at a testing site owned by Nihon Onkyo Engineering Co., Ltd.

### 「brackets」 designed by nendo, Inc.

nendo

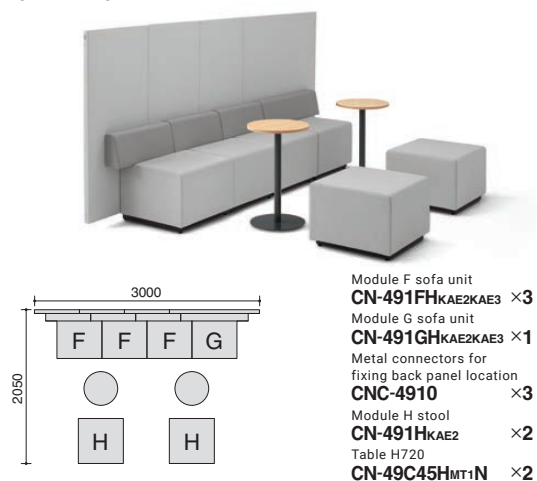

Brackets was designed by nendo, Inc., an architectural and interior design firm founded in 2002 by Oki Sato (born in 1977 in Canada). With offices in Tokyo, Milan, and Singapore, nendo, Inc., engages in a wide array of services covering architecture, interior design, products, and graphics, following its concept of giving people a small "I" moment. In a 2006 issue of Newsweek, Oki was listed among the 100 Most Respected Japanese people in the world. In a 2007 issue of the same magazine, nendo was listed among the Top 100 Small Japanese Companies. In 2012, Oki was named as Designer of the Year in Wallpaper Magazine (a British monthly) and earned the same title at the Elle Deco International Design Award. Oki's most celebrated works are housed in prestigious museums around the world, including New York's Museum of Modern Art, Centre Pompidou in France, and the Victoria and Albert Museum in the UK. # Configurations

## Informal cafeteria layout

This layout pairs a sofa with stools for relaxed face-to-face gatherings. It facilitates casual conversations.

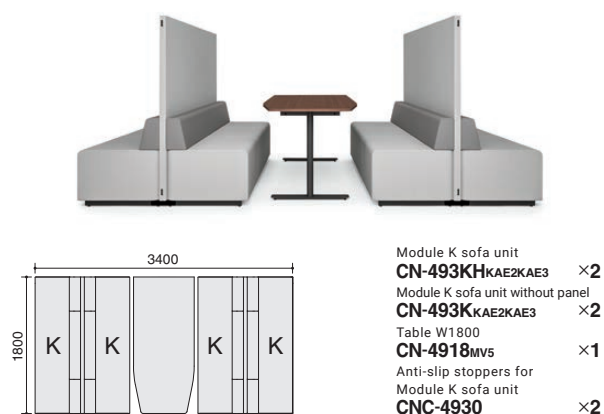

## Booth + high table layout

This layout combines a sofa booth with a high table (Brackets Lite). It generates spontaneous encounters along walkways in an open space.

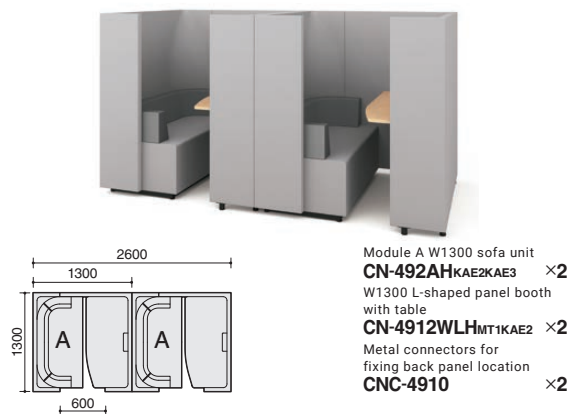

## Semi-open booth layout

This layout consists of half-booths that do not block the light even when installed by a window. The open layout is ideal for meetings.

## Focus booth layout

This layout consists of solo booths, each with a W1300 sofa unit and a panel booth with table. Each booth is ideal for focused solo work.

## 2-4 person meeting layout

This layout is designed for focused meetings with the participants facing each other.

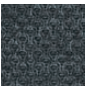

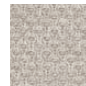

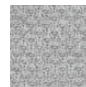

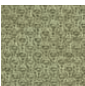

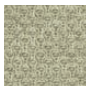

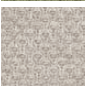

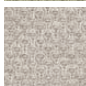

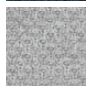

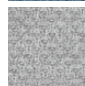

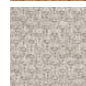

## 1-on-1 meeting layout

This layout consists of 2- or 3-seater booths, each with a W1900 sofa unit and a panel booth with table. Online meetings can be held without worrying about the background.

# MATERIALS

## Sofa, stool

### Seat, lumbar

Body: Plywood, polyurethane foam.

Base: Powder-coated steel and melamine.

Upholstery: Fabric.

### Back panel

Sound-absorbing urethane, plywood, MDF, polyurethane foam.

Upholstery: Fabric.

● Category M unit comes with power outlet and 1.4 m cable (other units do not have these).

## Tables

### Tabletop

Particle board, melamine board.

### Base

Powder-coated steel.

### Panel base

Sound-absorbing urethane, plywood, MDF.

Upholstery: Fabric.

## High table with panel (Brackets Lite)

### Panel

Sound-absorbing urethane, plywood, MDF, polyurethane foam.

Upholstery: Fabric.

### Tabletop

Particle board, melamine board.

### Base

Powder-coated steel.

Note: Please prepare connectors as required for connecting back panels of sofas.

This product is constructed with the urethane foam over wood frames like lounge sofas to provide the same sense of comfort.

Most creases on the upholstery fabrics can be smoothed over by hand.

The seams at the rounded inside corners of the lumbar are set at an angle.

Dark-colored tabletops may show fingerprints and other smudges more noticeably depending on usage and lighting conditions.
