Any Wall

Create a mobile base of operations with Any Wall. Designed on castors for total mobility, it enhances project work for both in-person and hybrid teams by providing a versatile focal point for collaboration.

GOOD DESIGN AWARD 2023

BEST 100

FEATURES

A simple frame to maximize customization

Accessory parts can be added to the frame horizontally or vertically.

Smooth-rolling large castors

The smooth-rolling large castors allow you to reconfigure the layout freely to suit any work setting. The castors have stoppers for safety.

A monitor can be mounted to the frame to make work easier

Enhance your workspace by mounting a monitor directly to the frame. Any Wall is designed to accommodate large displays, making hybrid communication more efficient than ever.

MATERIALS

Large castors

The large castors maximize load bearing capacity and movability. The stopper allows you to switch between free-moving mode and locked mode.

Body, leg, shelving, base
Powder-coated steel.

Castors
ø75 mm urethane with stopper (corner walls have stoppers on both sides; straight walls have stoppers only on the front castors).

Shelving load capacity (Uniformly distributed load)
Shelving: 294 N (approximately 30 kgf). Base: 392 N (approximately 40 kgf).
Front of corner wall or straight wall body (W1075 mm): 196 N (approximately 20 kgf).
Front of straight wall body (W1600 mm): 392 N (approximately 40 kgf).
Rear of body: 78 N (approximately 8 kgf). Sides of body: 39 N (approximately 4 kgf).

Caution: The stated load capacity for a corner wall indicates the load capacity for one of the two sections.
●Comes with cable cover.
