

# ladder screen

DAYS OFFICE

Ladder Screen comes in two types: a wall-side type that functionally enhances walls, and a freestanding type that gently divides spaces. The modular setup supports interchangeable accessories like whiteboards, book stands and pin-up boards, allowing you to customize your space for meetings or casual breaks.

●The adjacent ladder screens in the photo above are of an older design. Under the current design, there is a gap between adjacent ladder screens.

## FEATURES

Designed for easy access, the removable base lid discreetly conceals wiring from monitors and nearby electrical devices, maintaining the stand's clean aesthetic.

The simple back cover for the monitor maintains the orderliness of the space.

### Gently divides an interior space

The Ladder Screen gently divides the space while preserving a sense of openness. The series includes wall placement, freestanding, and planter-mounted configurations to suit any layout. A wide range of optional accessories is available—including whiteboards, book stands, and pin-boards—allowing for a fully customizable setup.

The optional accessories (e.g. whiteboards, book stands, pin-up boards) can be added and removed with ease.

Adjusters: PA.

## **Artificial plants**

Body: Polystyrene, polyester.

## **Ladder screens for sofa set or high counter set**

Body: Printed plywood.  
Edge: ABS.  
Adjusters: PA.  
Frame: Powder-coated round steel pipe with textured surface.

### Cautions

- Wall-side ladder screens must be secured to the wall using the mounting hardware provided.
- Do not exceed the maximum load capacity. Overloading may cause tipping or damage, leading to injuries.  
Assuming even weight distribution, the center bar has a loading capacity of 49 N (approximately 5 kgf).
- Sofa ladder screens must be secured to the sofa unit.
- High counter ladder screens must be secured to the high counter.
- The artificial plants must be kept away from heat sources or the direct path of airflow.
