

WT-400

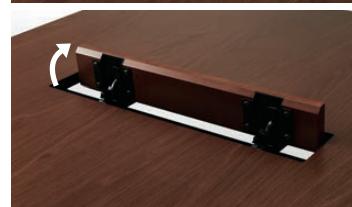

Select the perfect table from WT-400's extensive range of mid-to-high end conference solutions.

2013
GOOD DESIGN
AWARD
(awarded to WT-300 series)

FEATURES

Table with double flipper

Double flipper

This cable cover can be opened and closed from both sides. The surface wood grain is matched with that of the tabletop to create a sophisticated atmosphere.

The cover has a full-perimeter opening design which allows the cables to be drawn out from the box from any direction.

Table with open tray

Open tray with power outlet

Only available for high-grade tabletop

This power outlet is recessed into the tabletop for easy power access. The cable box has storage for speakers and other items. Each box has four dual-socket power outlets (only applicable in Japan).

VARIATIONS

Tabletop

Veneer tabletop

Made from artificial veneer with layered strips of natural wood, this tabletop combines the warmth of natural wood with sophistication to create a high-grade atmosphere. The chamfered edges create a slim appearance.

Standard tabletop (Melamine)

This tabletop has a hard surface for superior durability. The simple straight edges make the tabletop compatible with any space.

High-grade tabletop (Melamine)

This tabletop has a hard surface for superior durability. It features an embossed finish that replicates the texture of natural wood. The simple straight edges make the tabletop compatible with any space.

Legs

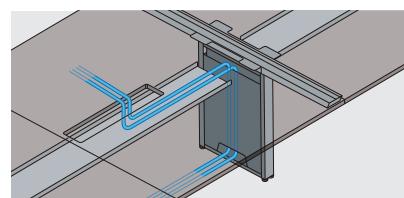

Polished base

The polished aluminum die-cast leg bases feature a beautiful lustrous finish that, combined with black painted posts, creates an elegant and sophisticated look.

Coated base

The leg bases and posts are color-matched, creating a cohesive and unified look. Available in two colors: Black and Flat Silver.

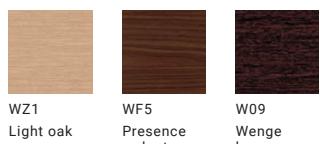

Center leg

Tables with a width of 3200 or greater have a midpoint cable post that can store a large array of cables vertically.

MATERIALS

Veneer tabletop

Tabletop

Surface: Artificial ayous veneer with polyurethane-coated finish.
Edge: Layered natural wood with polyurethane-coated finish.
Core: MDF.
Tabletop thickness: 26.5 mm.

Standard tabletop / High-grade tabletop

Tabletop

Surface: Melamine board.
Edge: Extruded ABS.
Core: Particle board.
Thickness: 25 mm.

Specifications common to all tables

Coated base

Leg: Powder-coated steel.
Base: Powder-coated die-cast aluminum.

Polished base

Leg: Powder-coated steel.
Base: Polished die-cast aluminum.

Beam

40 mm powder-coated square steel pipe.

Double flipper

Surface, edge, core: Same as tabletop.

Open tray with power outlet

Body: Powder-coated steel.
Power outlet: ABS, POM.

●Floor level adjustment range: 18 mm.

●Because the products are made from natural wood, the woodgrains and color on one product or one part of a product may not always match those on other.

Caution: Dark-colored tabletops may show fingerprints and other smudges more noticeably depending on usage and lighting conditions.
