FEATURES

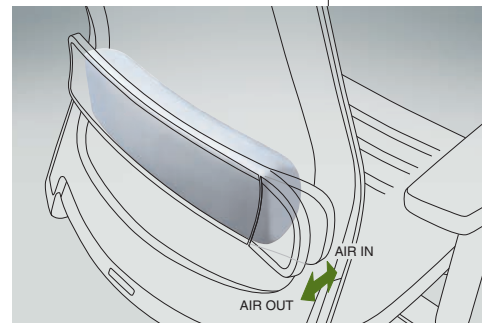

Posture support seat

The seat's indented and contoured shell holds the pelvis in place, and the cushion adds stability and comfort. This design prevents anterior pelvic tilt, improving pressure distribution to allow for longer periods of comfortable work.

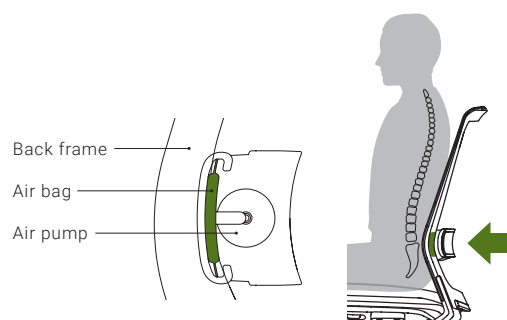

Air slit seat

The seat cushion's airflow slits and three-dimensional mesh dissipate body heat for maximum user comfort.

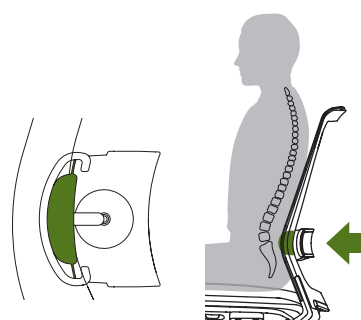

Air-lumbar support technology

The adjustable air bag inside the lumbar support can be inflated and deflated via an integrated lever to perfectly match the user's spinal curve. This customised shaping provides optimal support and promotes proper spinal alignment during prolonged sitting.

Neutral

Supported

FEATURES

As versatile as air itself.

AIRFORT's innovative, high-quality design and stylish aluminium components ensure the chair fits seamlessly into any office environment.

Lumbar support

Range: 100mm, up and down

The air-lumbar support technology is adjustable in both position and air amount.

Headrest

Vertical range: 50mm, angle: 40°

The adjustable headrest allows for changes in height and angle.

Auto-adjustment mechanism

4 fixed angles, max locking angle: 125°

The auto-adjustment mechanism synchronises the seat and back, eliminating the need for additional adjustment levers.

Height adjustable armrests

Vertical range: 80mm

The armrest height is adjustable to suit the desk and provide better elbow support.

Height adjustable seat

Seat height range: 425-505mm

The seat can be adjusted with a single push of a button.

Seat depth adjustment

Seat depth range: 410-460mm

The cushion depth can be adjusted to suit the user's preference.

Durable and serviceable

Kokuyo is committed to sustainability by designing long-lasting, serviceable products. Airfort's flexible design incorporates replaceable parts, making the chair exceptionally robust and comfortable, with its low carbon footprint ensuring it is also ecologically sustainable.
