

# KATE

---

Combining sophisticated, simple design with function, this lightweight chair purposefully highlights the distinctive texture of magnesium.

2020  
GOOD DESIGN  
AWARD

## FEATURES

The Kate chair features a minimalist, honest aesthetic, highlighting its unique magnesium frame. This magnesium alloy composition makes the chair exceptionally lightweight and stable while providing high material efficiency. Magnesium is highly recyclable because it can be melted and reprocessed repeatedly with a 95% reduction in energy consumption compared to primary production, retaining its strength and purity.

A matte clearcoat finish enhances the inherent metallic texture.

A highly practical metal chosen specifically to deliver maximum lightness.

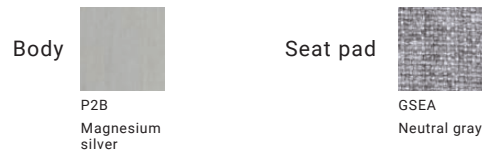

Removable anti-slip seat pad.

Light weight for easy stacking.

\*Seat pad to be removed before stacking
