

EDIA

A storage system that combines sleek, minimalist design with versatile functionality and advanced security features.

VARIATIONS

Standard (white) unit

The white color scheme creates a simple, relaxed atmosphere. The unit is available in a range of shapes and sizes.

Black unit

The black color scheme creates a refined, sophisticated atmosphere. Many shapes and sizes are available.

Wood grain unit

From natural to chic, a range of wood grain surfaces are available to suit interior space.

Free-panel unit

This system has the design aesthetics to match an open office environment. In a new approach to storage, the system allows you to retrieve items from both sides.

Locker unit

This generously sized unit includes two personal lockers and 24 mailboxes. You can choose from a range of lock options to suit your security needs.

Utility unit

We offer a wide range of utility options so that you can choose the ideal functionality for your utility area.

Business saver

This unit keeps office items in one place for added space-efficiency. The unit is controlled by central lock.

FEATURES

Flat design

The storage systems have a sleek and minimal design. The flatness lends a simplicity to the atmosphere.

Pull handle design

Incorporating universal design principles, the large pull handle is easy to grasp and allows smooth opening and closing.

Swing doors

The 180° opening door allows access to stored items without blocking the aisle. We have also adopted low-profile hinges, which are convenient in places where the door cannot open more than 90° due to a wall or other obstructions.

3 sliding doors

Opening the three sliding doors frees up about 60% of the cabinet front and allows easy access to the stored items in the middle. (The W900 cabinet has a door-opening dimension of W530 mm).

Latches

Doors and drawers are fitted with latches, which reduces the risk of accidental opening or contents spilling out during an earthquake.

Lateral file drawers

The drawer has double suspension. With a long stroke length, the drawer allows for smooth storage and retrieval.

Safety-lock cabinet

This cabinet has a safety-lock mechanism. When one of the drawers is pulled out, the mechanism locks all other drawers. This helps prevent the cabinet from falling over.

Accessories

Sliding whiteboard

You can save space by fitting a whiteboard to the cabinet.

Slip-prevention unit

In the event of an earthquake, the front bar on the shelf automatically rises to prevent contents from falling.

Top brace

For layouts where tall cabinets face each other, this brace connects the two cabinets at the top to prevent the cabinets from falling.

Locker unit

Lockers with door tray

The inside of the door has a tray to maximize storage space. The tray is useful for storing documents, pens, and other smaller items.

Lockers with cable organizer

A wiring hole is installed in each personal locker by default. Wiring enables the charging of devices such as PCs.

SECURITY

| Lock systems

Auto dial lock Zelock

Available for:

- Standard (white, black) unit
- Locker unit

Auto dial lock Zelock E

Available for:

- Locker unit

Adds extra security for peace of mind by eliminating the need to remember to lock the door

The door locks itself automatically when closed and requires no physical key. When the door is open, the security code is reset to 0000 to prevent anyone seeing the code.

Cylinder lock

Available for:

- Standard (white, black) unit
- Locker unit
- Wood grain unit
- Business saver unit
- Utility unit

Features an open/close indicator that shows the locking status at a glance. It displays red when locked and blue when unlocked. The replaceable cylinder specification also facilitates easy operation and management.

Dial lock

Available for:

- Standard (white, black) unit
- Locker unit

This lock system uses 4-digit security code with manual dials.

SIZE OPTIONS

Height Parenthesized figures indicate height in the case that the base height is 100 mm.

Width (W), depth (D)

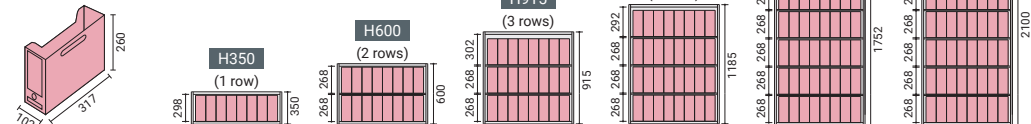

Selecting cabinet sizes per your filing system (open unit, double-door unit, slide-open door unit)

You can select a cabinet that maximizes storage capacity by performing a volume simulation based on your filing system, using common storage units such as vertical or horizontal file boxes.

※ Shelving pitch: 23.4mm
Shelf depth: 377(327) mm

A4 end opening file (horizontal)
Examples of file box storage

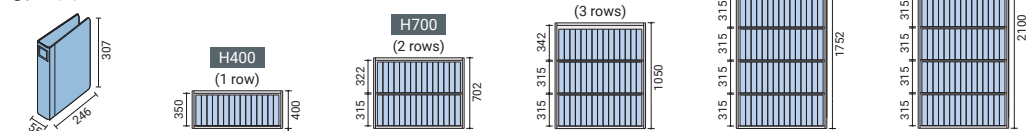

● A4-LFFB

Caution: If you choose 6 or 7 rows, please add shelf BWUA-T9 (S) or BWUA-T8 (S).

A4 side opening file (vertical)
Examples of tube file storage

● 7-RT640
