

big counter cabinet

DAYSOFFICE

A large counter cabinet that features both the functionality to organize cafe equipment and a design that utilizes large wall surfaces to add warmth to the space.

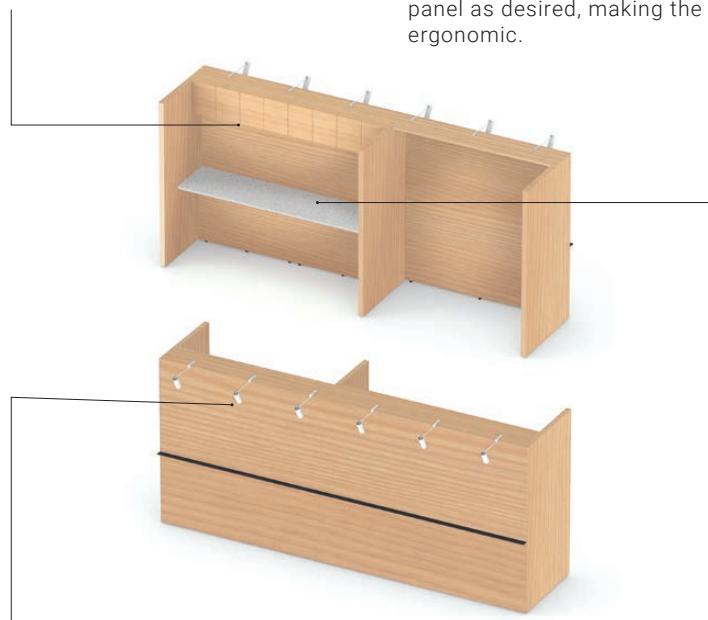

FEATURES

The overhead cupboards come fitted as standard with underside lighting. Indirect LED lighting is installed at the top of every kitchen, storage, and casing section to create a warm atmosphere.

The storage can accommodate large appliances as well as smaller items for coffee corners. Supplies can be stored in the overhead cupboards or in the utility cart. You can hang small cafe equipment from the perforated panel as desired, making the coffee corner tidy and ergonomic.

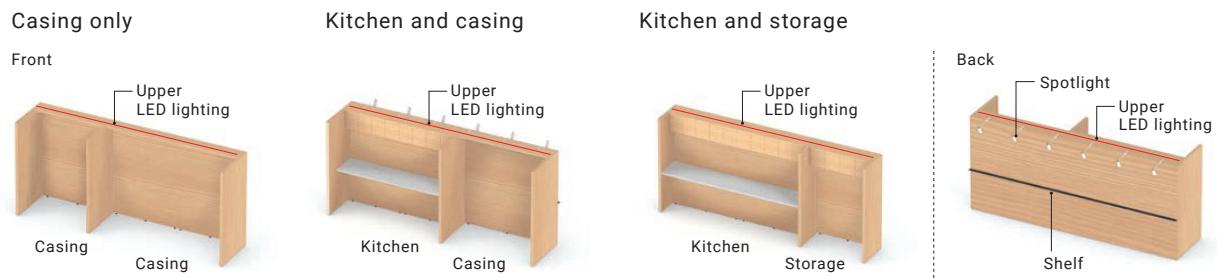

The back panel is equipped with a shelf and set of spotlights. The shelf is ideal for displaying magazines upright. It is also ideal for poster panel displays.

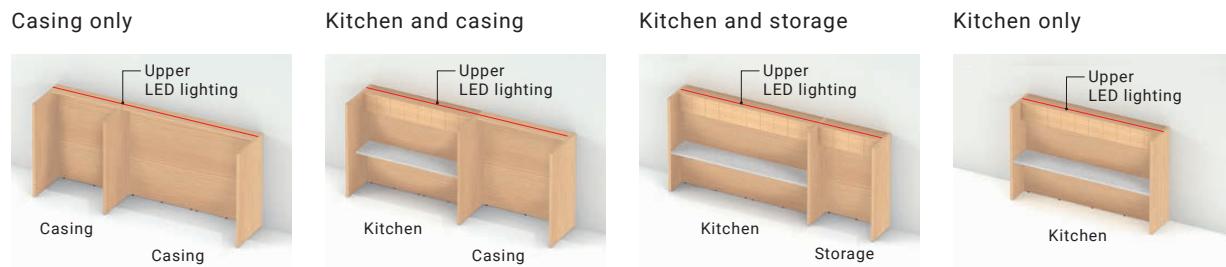

We have a number of preset configurations. Choose a configuration according to your storage needs. Designed to accommodate large appliances, the counter can be installed against a wall to create a neat coffee corner in a limited space. It can also be installed free-standing as an island configuration in an open area of the office.

VARIATIONS

Island configuration

Wall placement

Configuration examples

The back panel, being a W1500 module, can be used in combination with modules from other series.

Ladder Screen: Wall-side

Wall Shelf: Tall, Single-sided
