

Any way

enjoy working freely

Converse. Collaborate. Create.

Lively conversations. Versatile collaborations. Innovative creations.

The office becomes a free-style space, an engaging workplace.

People together, sharing ideas and impressions.

Any way encourages open, active teamwork.

Product information on Any Tool, Any Wall, Any Wagon, and Optional Parts is not included in this proposal. We apologize for the inconvenience, but if you require information on any of these products, please contact us by clicking on "Contact" at the bottom of Any way website page, or contact our sales representative.

Any way series is designed for the office of the new era,
which focuses on mobility, comfort, and design.

While the world has changed dramatically,
and our workstyle has diversified in just a few years,
we have always valued the synergy created
when people come together.

Communication and creativity are accelerated and generated
when people, space, and furniture move around
in a positive and dynamic manner.

KOKUYO proposes an office
"where people want to gather more" with Any way

AGILE WORKING

Any

Casual and light design with comfortable usability
A simple chair that matches every scene

Seat cushion

The seat cushion made of thick molded urethane distributes body pressure. Combining simple design with spacious seating comfort.

Seat structure

Thick molded urethane is layered over a shell layer with a deep center, which provides seating comfort and excellent durability.

PP back plate with fungicide★

99% reduction of bacteria after 24 hours compared to surfaces of products without antimicrobial treatment. Antimicrobial resistance is based on test results in accordance with the international standard ISO 22196.

★Antimicrobial performance is for the back plate only. The antimicrobial treated portion of this product reduces certain bacteria on the surface, but does not guarantee the prevention of infection. In addition, the antimicrobial treatment is not intended to treat or prevent disease.

Small-diameter casters for light movement

Small-diameter casters in matching color as the main body. Free maneuverability supporting your posture.

The casters are "polyurethane wrapped casters" suitable for hard floors such as wood flooring. Rubber casters cannot be attached to this product. (Do not use on cushion flooring, as it may damage the floor.)

Horizontal stacking for easy storage

No need for lifting, smooth movement. Efficient storage.

Stacked horizontally by flipping up the seat. (Stacking pitch : 250 mm)

Any High Stool/Any High Bench

Surprising new ideas from quick casual conversations
High Stools and High Benches for open communication

| Casters and back frame for enhanced mobility

For easy mobility, the high stool comes with small-diameter casters in matching color as the main body. The simple back frame design is easy to grip and supports standing and sitting.

PP back frame with fungicide*

99% reduction of bacteria after 24 hours compared to surfaces of products without antimicrobial treatment. Antimicrobial resistance is based on test results in accordance with the international standard ISO 22196. (High Stool only)

★Antimicrobial performance is for the back frame only. The antimicrobial treated portion of this product reduces certain bacteria on the surface, but does not guarantee the prevention of infection. In addition, the antimicrobial treatment is not intended to treat or prevent disease.

Seat structure

Thick molded urethane is layered over a base layer with a deep center, which provides seating comfort and excellent durability. (Common specifications for high stools and benches)

| Under frames for easy carrying

The high bench is designed with an under frame beneath the seat at both ends, which also functions as a handle for carrying.

| High setting for open conversation

A compact high stool and a high bench for multi-directional seating. The height of the stools encourages open interaction.

Any Sofa

Voluminous presence creates a casual atmosphere
Unit sofa with casters on front side for swift mobility

| Frame shape for enhanced mobility

The upper part of the frame, which has an arched shape, provides a handle that is easy to grasp when moving. The back cushion moderately holds and keeps the posture.

Frame shape for enhanced mobility

The back frame is sloped from bottom to top. The handles are easy to grasp even when placed against a wall.

Frame shape for enhanced mobility

The back cushion is secured to the seat with a fastener, keeping the back cushion attached while moving.

| Square shape with casters

Square shaped sofa for easy layout.
Small-diameter casters in matching color as the main body are on the front side for smooth movement.

| Soft design

Soft design seat and cushion provide both postural support and seating comfort for work.

Any Table

Detailed low-profile top and single-sided casters make light work
Collaboration table for a new era

Single-sided casters for smooth layout

Small-diameter casters in matching color as the main body on single-side.
The table can be easily moved by lifting the tabletop to make layout change.

Edgeless tabletop

Steel painted finish realizes edgeless design.
The entire tabletop is the same color with a sense of unity.

<Caution>

- When moving the table, lift up the top board on the adjuster leg side.
- There is no stopper function on the casters. The table may shake or move easily due to the characteristics of the product.
- The surface of the tabletop may show scratches or changes in luster depending on the conditions of use compared to melamine tabletop.

Beamless design with comfortable space

Reducing interference with legs and chairs, helping to sit comfortably.

Energy Pole

Easy power access for swift work start-up
Simple power pole for all spaces

Ports for various postures and user-friendly heights

Slim design for placement by the table

Prevents wiring clutter on the desk and makes efficient use of space.

Easy to hold with one hand

(Weight : 2.2kg)

The lamp on the top surface
lights up when power is supplied.
